d These figures are incomplete.
e In the local report the area is given in bighas, which have been converted into acres at the rate of 3,600 square yards to the bigha.
f These figures evidently include in some cases the yield of *uncleaned* cotton, though given in the local reports as *cleaned* cotton, the yield in some of the districts being stated as 12 maunds or 987 lbs. per acre.
g Estimated by dividing the total outturn by the number of acres under cultivation.
h This average is unusually low owing to sowings in the Kadur and Chitaldroog Districts (3,357 acres) having in consequence of drought yielded less than 1 lb. per acre.

c In the local report the quantities are given in maunds, which have been converted into cwts. by taking the maund @ 82⅔ lbs.
d The local authorities consider these figures untrustworthy.
e These are only the estimated quantities of cotton consumed by the mills.
f Nearly the entire outturn of the Province supplemented by imports from the N. W. Provinces, the Central Provinces, and the Punjab, is used for local consumption, the cotton exported by sea consisting chiefly of the produce of the Punjab and the N. W. Provinces.
g The total outturn of the Province is insufficient for local consumption, and cotton is imported to meet local demands.
h Apparently an over-estimate.
i Nearly all the cotton grown in the province is consumed locally, the exports by sea consisting chiefly of cotton brought down from Upper Burma to Rangoon.
j Estimated outturn.
k For the official year ending 31st March.
l The local consumption has been estimated by adding to the outturn the amoun of cotton imported (30,563 cwts.) and deducting the amount exported.

NOTE (1).—Throughout this series, with the exception of table 22, the figures for Merchandise and Treasure include the Imports and Exports on account of Government.

(2).—For the years 1870-71 to 1873-74, revised figures have been included in all the tables in this series for Government treasure, and in tables Nos. 1 and 2 for Government stores only. As corrected details in regard to articles and countries for Government stores are not available, the revisions could not be carried out in the remaining tables, in which the totals of Merchandise for these years will consequently not be found to agree with those in tables Nos. 1 and 2.

(3).—The amounts for Bengal and Bombay up to 1852-53 are those for Calcutta and Bombay only, the subordinate Bengal and Bombay ports not being included.

(4).—Up to 1865-66, the figures in this series were taken from the returns presented to Parliament. But from 1866-67 a consolidated Volume of Trade Statistics for the whole of British India has been compiled from returns furnished monthly by Local Governments; and from this year the figures in tables 1, 2, 3, 4, 6, 7, 8, 10 and 12 have been taken from this consolidated account; while those for Merchandise in tables 5, 9, 11, 13, 14, 15, 16, 17, 18, 19 and 20, shewing the trade of each province with certain foreign countries named, have been taken from the volumes published by Local Governments.
